

A Sample Foils Document

AAAAA

May 8, 2026

1. Getting started

- a first foil
- lists
- quotes and enumeration

A first foil

`foils` is a small slide class inspired by `FoilTeX`. It keeps the authoring model simple: make a title page, start sections, and add foils.

- Use `\makesection{...}` for section title pages.
- Use `\makefoil{...}` for content foils.
- In lecture mode, page numbers are shown as section–page.

Lists

- This is the first level of an itemized list.
 - Here is the second level.
 - * And here is a third level.
 - * Nested lists use tighter spacing.
 - Another second-level item.
- A second first-level item.
- A third first-level item.

Quotes and enumeration

This foil has no special page controls beyond the standard foils heading style.

. . . it is a good idea to make your input file easy to read.

1. This is an enumerated item.
2. This is another enumerated item.

Use modern commands such as `\emph{new foil}` rather than old font switches.

2. Text and symbols

- fonts
- special characters and accents

Fonts

- This shows *roman italics*, *slanted*, **boldface**, typewriter, roman, and SMALL CAPS.
- Unslanted *emphasis* and *slanted* emphasis.
- Size changes: tiny, scriptsize, footnotesize, small, normalsize, large, Large, LARGE, huge, and Huge.

Special characters and accents

- Accents: `ò, ó, ô, ö, õ, ô, ò, ð, ð, ð, ô, ô, ô, ô.
- Paragraph symbols: †, ‡, §, ¶, £, 0123456789, ©.
- Math symbols: †, ‡, §, ¶, £, 0123456789.
- Language symbols: œ, Œ, æ, Æ, å, Å, ø, Ø, †, ‡, ß, ç, ÿ.
- TeX specials: #, \$, %, &, -, {, }.

3. Mathematics

- displayed mathematics
- arrays
- numbered equations

Displayed mathematics

$$\mathcal{F}\cdots\frac{x+y}{1+\frac{y}{z+1}}=\sqrt{x+y}\times\sqrt[n]{2}$$

$$\forall \exists \mathbb{H} \# \partial \angle \Re \mathfrak{U} \jmath \aleph$$

$$\cap \cup \vee \wedge \odot \otimes \oplus \uplus \Sigma \amalg \coprod \int \oint$$

$$\sum_{i=1}^n x_i = \int_0^1 f[x] \, dx.$$

Arrays

$$\begin{array}{cccc}
 a + b + c & uv & x - y & 27 \\
 a + b & u + v & z & 134 \\
 a & 3u + vw & xyz & 2,978
 \end{array}$$

$$x = \begin{cases} y & \text{if } y > 0 \\ z + y & \text{otherwise} \end{cases}$$

$$\begin{array}{ll}
 \text{minimize} & f_0(x) \\
 \text{subject to} & f_i(x) \leq 0, \quad i = 1, \dots, m \\
 & h_i(x) = 0, \quad i = 1, \dots, p
 \end{array}$$

Numbered equations

Here is a numbered equation:

$$E = mc^2 \tag{1}$$

And a numbered array:

$$x = 17y \tag{2}$$

$$y > a + b + c + d + e + f + \\ k + l + m + n + o + p \tag{3}$$

4. Tables and figures

- tables
- picture environments
- footnotes and citations

Tables

Here is a short table:

First stuff	Second stuff	Third stuff
foo	bar	bug
foofoo	barbar	bugbug

Picture environments

For real graphics, use `graphicx`, which the `foils` class loads by default.

Footnotes and citations

A footnote can be placed in slide text.¹ This foil also cites references such as [RB90] and [Bul90].

References

[RB90] Rocky and Bullwinkle, Open problems, in *Mr. Know-it-all's Rock Encyclopedia*.

[Bul90] Bullwinkle, Getting things out of hats, *Annals* **1** (1990BC), 1–2.

¹This is a footnote.

Appendix

Backup material

Appendix foils are numbered A1, A2, and so on.

The `\vf` helper inserts stretchable vertical space.
